

Vertical features

Answer the questions and follow the arrows to find out what habitats you have. When you reach a rectangular box, work with your teacher to add this habitat to your map.

Habitat Mapper key

Point

Line

Area

Part one: look around your site for vertical features like walls, fences and sheds. Map all the vertical features on your site and identify what they are made from.

The habitat is a wall

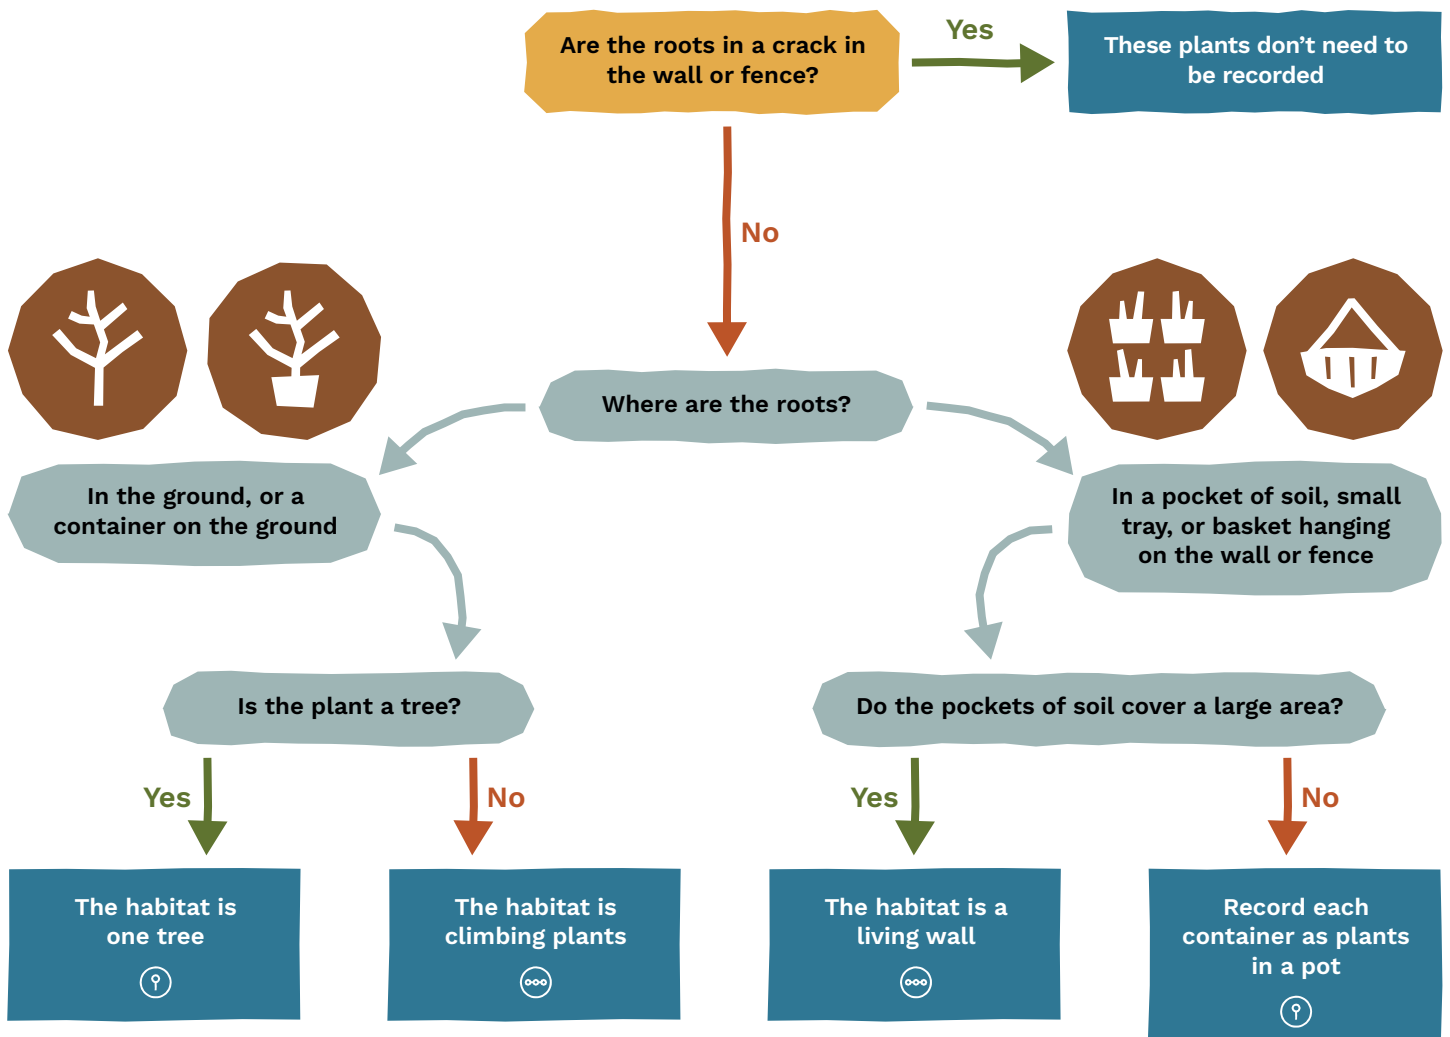

The habitat is a metal fence

The habitat is a wooden fence. This includes fences, sheds, and wooden plant supports

Part two: follow the plant's stem down to its roots. If the plant doesn't have a stem, like moss, you don't need to map these plants.

Green roofs

If you have a building, shed, bike park or similar where the roof has plants on it (planted into gravel or soil, not in pots), you can add it to the map as a green roof.
