

Reed Baskets

.....

Weaving reeds into baskets has been done for many centuries to carry and store materials and to keep stray items about the home.

Thatched Roofs

.....

Many thatched roofs are made out of reeds because it is durable and offers insulation from colder weather conditions.

Arrows

.....

Traditional arrows were made from reeds because they were straight and lightweight.

Instruments

.....

Reeds are used in many wind instruments, such as the clarinet, saxophone, oboe, and bassoon.

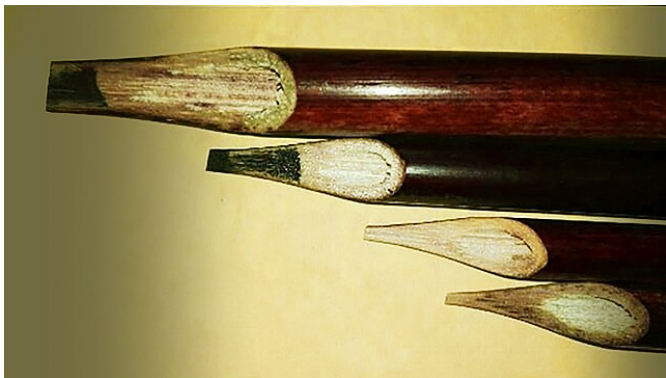

Reed Pens

.....

A reed pen, invented in Ancient Egypt, was made by cutting and shaping a single reed straw.

Wildlife Habitats

.....

Reedbeds support a wide variety of animals, with drier areas for voles, water shrews and harvest mice and otters.

Paper (Papyrus)

.....

Reed can be harvested, cut and the fibre can be made into a type of paper called papyrus.

Rare Species

.....

Reedbeds are important habitats for the rare and threatened species of birds including Bittern, Marsh Harrier and Bearded Tit.

A natural filter system

.....

Reeds are good at helping clean our water, filtering and purifying wastewater and providing a buffer against pollutants from industry and farming.

Composting toilets

.....

Reeds can be incorporated into composting toilet systems, filtering and cleaning the waste out instead of flushing it away into a sewerage system.

Simple Mattresses

.....

The Romans used to stuff their mattresses with reeds.

Food

.....

Indigenous people of America would dry the stems of reeds, grind them into a fine powder to make a sweet dish (like marshmallows).
